

**How's this as an idea?  
Regarding the Wall between the US & Mexico.**

- 1) Buy, Beg, give, sell, borrow or steal all the hemp seed you can get your hands on.
- 2) Find a farmer, or someone who knows a farmer and have the farmer plant the hemp seeds.
- 3) Police - leave the farmer alone, forget about the seeds. Forget about the truck-loads of hemp.
- 4) President and Congress fund, and encourage everyone to participate, including banks.
- 5) Media - deliver news that encourages this endeavor.
- 6) Harvest time comes, take hemp to central location (near train possibly, truck stop).
- 7) Engineers will figure out how to build a wall most cheaply, and discovered to their amazement - hemp is best because it keeps the economy going, puts thousands of people to work, and creates a cheaper and stronger wall.
- 8.) Immigrants who want to come to America, build the wall. Wage is "according to need" and after one year are processed into the country.
- 9) The country has re-tooled and the production of hemp products explodes. Everyone has work, the environment wins,
- 10) Once everyone smartens-up and discovers "just how silly all this squabbling is", the wall will be ready to bio-degrade and the "evidence" of a divisive Wall will have vanished.
